

NHS England Primary Care Transformation Fund

New investment at our practice

Hornchurch Healthcare is proud to announce that our surgery has been awarded an improvement grant to expand the premises to increase by three consultations rooms and a new treatment room.

The improvement grant is for £132000 and will part fund the development. Dr Tran will be funding the remainder of the costs.

Work will commence late February/early March and complete in October 2016.

Additionally we will have disabled access from the front of the premises.

Surgery will continue as usual.

The Transformation Fund is a four year programme to help general practice make improvements, including in premises and technology.
